

I am a fan of XM radio and have found their ability to provide traffic and weather far superior to local broadcasting. The major reason being that the information is constantly received and upgraded, allowing me to much more readily avoid traffic accidents, slow downs, tie ups etc. It is also safer because it is playing constantly I don't have to alter my concentration to pay attention at a certain time or if I miss it to wait another 10 minutes or so for the next update. Just having the radio tuned to the "traffic statio" allows me to be a better driver.

I am a small business man and a member of the NFIB and intend to share this information with them.
